Experience

Kunden Systems, Senior PL/SQL Analyst & AI Tech Lead

- Organized team workflows and processes, providing technical guidance and analyzing system changes to improve delivery quality, reduce rework, and ensure reliable solutions.
- Led the development of the company's AI assistant (RAG-based) used daily by a team of 10 consultants and support analysts, reducing ticket resolution time by ~30%.

Dois Irmãos, Brazil
Oct 2024 – present
1 year 10 months

Kunden Systems, Full-Stack Developer

- Refactored the inventory management module of the ERP system, ensuring security and reliability in transactions, reducing inventory-related support tickets by more than 50%.
- Developed new system features focused on efficiency and traceability for clients.
- Performed bug fixes and system enhancements to maintain stability and performance.

Dois Irmãos, Brazil
Mar 2021 – Sep 2024
3 years 7 months

Kunden Systems, Consultant

- Provided technical support to clients regarding the ERP system, ensuring effective issue resolution and user assistance.
- Organized, analyzed, and gathered requirements for development projects, creating new features and solutions within the system.

Dois Irmãos, Brazil
Jan 2019 – Feb 2021
2 years 2 months

Education

MBA Universidade de São Paulo (USP), Artificial Intelligence and Big Data

- Key Concepts: ML, Deep Learning, NLP, Neural Networks, LLMs, Big Data, Cloud, Python.

São Paulo, Brazil
Jul 2026 – Oct 2027

B.S. Unisinos, Systems Analysis and Development

- Key Concepts: Algorithms, Data Structures, Architecture, Project Planning, Java.

São Leopoldo, Brazil
May 2023 – Jun 2026

Projects

Kunden AI

Led the development of an AI chatbot using RAG (Retrieval-Augmented Generation) integrated with ERP system documentation, customer support logs, and other internal data sources. Includes a feedback loop that allows qualified users to validate responses and enrich the knowledge base through direct interactions.

- Tech stack: ChromaDB (vector database) · all-MiniLM-L6-v2 (embeddings) · mmarco-mMiniLMv2-L12-H384-v1 (reranker) · Gemma4 (31B, deployed via Ollama Cloud)
- Used by 10 consultants and support analysts, reducing ticket resolution time by ~30%.

Nov 2025 – present

Want-Want

Free web application for language learning, fully AI-powered. Features a tutoring chatbot with conversation history, text translation and generation tools, and a timed vocabulary game. A daily streak system follows the Quero-Quero (the state bird of Rio Grande do Sul) to real tourist destinations, combining language learning with regional tourism.

- Tech stack: Gemma4 (31B, deployed via Ollama Cloud) · Python · JavaScript · HTML · CSS

Jun 2026 – present

Skills

Programming: Python, PL/SQL, Java, JavaScript, C, SQL

Frameworks: Oracle Forms, Oracle Apex, FastAPI, OpenCV

Infrastructure: Docker, Git, Ollama

Databases: Oracle, SQLite, MySQL, ChromaDB

Languages

Portuguese (native) · English (full professional) · Spanish (limited) · German (elementary)

Awards

Employee of the Year 2023 — Kunden Systems
